

Power Paths

Fact Sheet

NOLA Code: INLE 1104
Program Length: 56:46
Release/Feed Date: 11/3/2009
Closed Captioned: Yes
Stereo: Yes
SAP: No
Format: HD
Suggested TV Rating: TV-G
Description: *Power Paths* follows grassroots efforts among the Navajo, Hopi, and Lakota Sioux as they explore ways to create the new renewable energy resources needed to preserve their communities. By re-vealing the struggle Indian leaders face harnessing abundant natural forces of wind and sun on millions of acres of tribal lands, *Power Paths* tells a much larger human story about America's struggle to understand, accept and implement a new path toward true energy security. The inspiring stories in this film vividly illustrate our potential for success in producing the power we need while preserving our planet's livability. Telling these stories through the eyes of America's Tribes exposes fundamental truths that will change the way we look at energy forever.
